

IN THE CLAIMS:

Page 9, (amended sheet from International Preliminary Exam Report/
Amendment), before claim 1, insert the following new paragraph:

(New) What is claimed is:

This following list of claims will replace all prior versions of claims in
the above-identified application:

List of Claims

List of Claims is from the Preliminary Exam Amended Sheets:

Claim 1: (Currently Amended) A water-soluble container (1) comprising at least one or more discrete chambers chamber (30, 31; 130, 131) for containing product, wherein at least a part (20, 27) of a first wall (11, 25; 125a, 125b) of each said at least one chamber 30, 31; 130, 131 is adapted to will dissolve before the a remainder wall of the chamber dissolves to allow product to escape, ~~characterised in that the at least part (20, 27) of the~~ first wall (11, 25) ~~adapted to dissolve~~ which dissolves before the remainder ~~of each chamber~~ wall dissolves defines a releasable part (19, 26), ~~such that~~ and when the at least part (20, 27) of the first wall (11, 25) dissolves the releasable part (19, 26) is released undissolved.

Claim 2: (Currently Amended) ~~[[A]]~~ The container (1) ~~according to as~~ defined in Claim 1, wherein the releasable part (19, 26) is a panel (19, 26) and the at least part (20, 27) of the first wall (11, 25) at least partly surrounds the panel~~[[,]]~~ ~~such that~~ (19, 26) whereby the panel (19, 26) is released when the at least part (20, 27) of the first wall (11, 25) has dissolved.

- Claim 3: (Currently Amended) ~~[[A]] The container (201) according to any preceding claim~~ as defined in Claim 1, wherein the at least part of the first wall (225) comprises ~~includes at least one or more clip elements~~ element (220) adapted to retain which retains the releasable part (225) until dissolved.
- Claim 4: (Currently Amended) ~~[[A]] The container (1) according to any preceding claim~~ as defined in Claim 1, wherein the at least part (20, 27) of the first wall (11, 25) is thinner than the remainder wall of the container.
- Claim 5: (Currently Amended) ~~[[A]] The container (1) according to~~ as defined in Claim 4, wherein the material thinning (20, 27) is arranged on the interior surface of the chamber wall.
- Claim 6: (Currently Amended) ~~[[A]] The container (1) according to any preceding claim~~ as defined in Claim 1, wherein the container is formed by injection moulding.
- Claim 7: (Currently Amended) ~~[[A]] The container (1) according to any preceding claim~~ as defined in Claim 1, wherein ~~the container is formed by injection moulding~~ at least part of the material from which the container is formed is polyvinyl alcohol.

- Claim 8: (Currently Amended) [[A]] The container (1) ~~according to any preceding claim~~ as defined in Claim 1, wherein at least part of the material from which the container is formed is a polylactic acid.
- Claim 9: (Currently Amended) [[A]] The container (1) ~~according to any proceeding claim~~ as defined in Claim 1, wherein at least part of the material from which the container is formed is starch-based.
- Claim 10: (Currently Amended) [[A]] The container (1) ~~according to any preceding claim~~ as defined in Claim 1, wherein the whole of the container is formed from the same material.
- Claim 11: (Currently Amended) [[A]] The container (1) ~~according to any preceding claim~~ as defined in Claim 1, wherein the container is flexible.
- Claim 12: (Cancelled.)

- Claim 13: (New) The container (1) as defined in claim 1 including a second discrete chamber (130, 131) for containing product, at least a part of a first wall (125a, 125b) of said second chamber (130, 131) will dissolve before a remainder wall of the second chamber dissolves to allow product to escape, and the at least part of the first wall (125a, 125b) of the second chamber which dissolves before the remainder wall thereof dissolves at a different dissolution rate than the dissolution rate of the at least part (20, 27) of the first wall (11, 25) whereby products in the chambers escape sequentially therefrom.
- Claim 14: (New) The container (1) as defined in Claim 13, wherein the container is formed by injection moulding.
- Claim 15: (New) The container (1) as defined in Claim 13, wherein at least part of the material from which the container is formed is polyvinyl alcohol.
- Claim 16: (New) The container (1) defined in Claim 13, wherein at least part of the material from which the container is formed is a polylactic acid.
- Claim 17: (New) The container (1) as defined in Claim 13, wherein at least part of the material from which the container is formed is starch-based.
